St. Elisabeth Group - Catholic Hospitals Rhein-Ruhr,
St. Anna Hospital Herne/Marien Hospital Herne University
Hospital/Marien Hospital Witten, Germany
- Minimally Invasive Spine Surgeons Association (Thailand)

Invitation

Dear colleagues,

Cervical and lumbar disc herniation is a common problem requiring discectomy. In general, open spinal discectomy is associated with muscle and ligamentum flavum dissection which can cause scarring and long-term side effects. In order to make cervical and lumbar disc surgery minimally invasive, Prof. Dr. med. Sebastian Ruetten has developed a Richard Wolf endoscope for both cervical and lumbar discectomy. His operative techniques significantly reduce the risks of these potential complications.

The endoscopic cervical and lumbar discectomy is another step advance from cervical and lumbar microdiscectomy that is performed with the use of the operating microscope. The surgical visualization by an endoscope is better than with the operating microscope. Because an endoscope can enter into surgical anatomy and has a capability to look around with 25-degree lens unlike the operating microscope that views the surgical site from a distance, endoscopic discectomy requires a smaller incision and less tissue dissection than microscopic discectomy. Obviously, this minimally invasive, less traumatic, endoscopic cervical and lumbar discectomy leads to excellent results, faster recovery, and significant economic saving, which is extremely gratifying for both the patient and the surgeon.

This time we include more advanced lecture and workshop table for recess decompression surgery with the new scope. We have accomplished this technique for a couple of years with good results.

We will devote ourselves to further development in the field of minimally invasive spine surgery. In this situation, we are very grateful for your participation. We hope that this training course will offer great opportunities for neurosurgeons and orthopedic surgeons to communicate, exchange experiences and upgrade their expertise which would eventually lead to further development and innovation in this field.

Thank you very much.

Message from Chief Medical Officer of Bumrungrad International Hospital

Dear colleagues,

At Bumrungrad, we strive for professional excellence and innovation in all we do. We participate actively in the advancement of medicine practice through research and education. For Spine Surgery, in June 2011 the Bumrungrad Spine Institute has been established at our hospital. In addition, we launched the Asian Full Endospine Training Center in collaboration with St. Anna Hospital Herne and Richard Wolf GmbH at Bumrungrad. This evidenced the recognition of the capabilities and experience of our spine surgeons in advance endoscopic techniques pioneered in Germany.

As you may already be aware, Prof. Dr. med. Sebastian Ruetten is a world pioneer who invented a special technique for using an endoscope to operate patients with herniated discs and stenosis. In 2008, Dr. Ruetten and Dr. Kuansongtham decided to become partners in training doctors around the world for the full-endoscopic spine and cervical surgery. Each year, they will jointly organize a symposium for full-endoscopic surgery of the lumbar and cervical spine twice a year in Germany (March and September), and once a year in Thailand (around January).

Since Thailand is the only training center in Asia, each time we received participants from many countries in this region like Hong Kong, Malaysia, Korea and India. We trust that you will find our symposium even more interesting forum for exchange of knowledge and experiences among doctors with diverse background.

Assoc. Prof. Dr. Taveesin Tanprayoon

Chief Medical Officer

Bumrungrad International Hospital

Cadaveric Workshop : Thammasat Medical Skill and Education Center (TMEd)

From

08:15-08:30 h

Welcome and introduction

V. Kuansongtham

Cadaveric Workshop - Part I:

09:00-09:15 h

Repetition access techniques – Full-endoscopic foraminal approach of the lumbar spine

W. Kesornsak, V. Kuansongtham, S. Ruetten, M. Komp

09:15-12:45 h

Practical exercises for participants

Module 1: Cervical Spine: posterior approach

Module 2: Lumbar spine: Spinal stenosis

Instructors:

S. Ruetten, M. Komp, V. Kuansongtham, T. Wattanawong, I. Komonhirun,

M. Ruangchainikom, W. Kesornsak, P. Kasempipatchai,

P. Wangsawatwong, V. Kotheeranurak, Y. Laungwitchajaroen,

T. Tanasansomboon, P. Tirawanish, D. Goethel

12:45 h-13:45 h

Lunch

Cadaveric Workshop - Part II:

13:45-14:00 h

Repetition access techniques – Full-endoscopic interlaminar approach of the lumbar spine

W. Kesornsak, V. Kuansongtham, S. Ruetten

14:00-16:45h

Practical exercises for participants

Module 1: Cervical Spine: posterior approach

Module 2: Lumbar spine: Spinal stenosis

Instructors:

S. Ruetten, M. Komp, V. Kuansongtham, T. Wattanawong, I. Komonhirun,

M. Ruangchainikom, W. Kesornsak, P. Kasempipatchai,

P. Wangsawatwong, V. Kotheeranurak, Y. Laungwitchajaroen,

T. Tanasansomboon, P. Tirawanish, D. Goethel

16:45 h

Closing

V. Kuansongtham

Thursday, February 5th, 2026
Global Spine Endoscopic Day : JW Marriott Hotel Bangkok

From 08:00 h	Registration	12.00-13.00 h	Lunch
08:30-09:00 h	Welcome and introduction <i>A. Charukitpipat, V. Kuansongtham, S. Ruetten, M. Komp, D. Goethel</i>	13:00-13:15 h	Group Photo
		13:15-13:45 h	Case presentation <i>P.Kasempipatchai, K.Ono, V. Kotheeranurak, T.Tanasansomboon, P. Tirawanish</i>
Lumbar / Thoracic Spine:		13:45-14:15 h	Full-endoscopic decompression in lateral and central stenosis - Application of the inter laminar and foraminal technique equipment <i>W. Kesornsak, V. Kuansongtham, S. Ruetten, M. Komp</i>
09:00-09:30 h	The foraminal full-endoscopic approach in disc herniations - Technique and indications of intra-, extra and transforaminal technique <i>S. Ruetten, M. Komp, V. Kuansongtham, W. Kesornsak, D. Goethel</i>	14:15-14:45 h	Technical aspects of full-endoscopic spinal applications & equipment <i>D. Goethel</i>
09:30-09:45 h	Discussion	14:45-15:00 h	Refreshment
09:45-10:15 h	Instructional video: Full-endoscopic operation with lateral foraminal access in disc herniation / Tape from St. Anna Hospital <i>S. Ruetten, M. Komp</i> Moderators: <i>M. Komp, S. Ruetten, V. Kuansongtham, A. Hansasuta, W. Mahattanakul, R. Chitragran, W. Kesornsak, D. Goethel</i>	15:00-16:00 h	Instructional video: Full-endoscopic operation with interlaminar access in lumbar stenosis and disc herniation Moderators: <i>V. Kuansongtham, W. Mahattanakul, W. Kesornsak, S. Ruetten, M. Komp, D. Goethel</i>
10:15-10:30 h	Refreshment		
10:30-11:00 h	The interlaminar full-endoscopic approach in disc herniations -State of the art, possibilities and limitations <i>W. Kesornsak, V. Kuansongtham, S. Ruetten, M. Komp</i>	Cervical Spine:	
		16:00-16:30 h	The full-endoscopic operation of the cervical spine with anterior and posterior access – Possibilities and limitations <i>M. Komp, S. Ruetten, V. Kuansongtham, W. Kesornsak</i>
11:00-11.15 h	Discussion	16:30-16:45 h	Discussion
11.15-12.00 h	Instructional video: Full-endoscopic operation with Interlaminar approach in disc herniation / VDO demonstration Moderators: <i>V. Kuansongtham, T. Wattanawong, A. Hansasuta, W. Mahattanakul, R. Chitragran, A. Boongird, W. Kesornsak, S. Ruetten, M. Komp, D. Goethel</i>	16.45-17.00 h	Closing <i>V. Kuansongtham</i>

Registration

Please send your registration form to Medical Education, Bumrungrad Hospital Pcl by January 17th, 2026

Tel: +66 (0) 2011 3141
or e-mail: medical.education@bumrungrad.com

Yes, I will participate in 58th International Training Course of Endoscopic Operation of the L,T,C Spine

- ☐ Intensive Course (5th and 6th February, 2026) (max 12 participants)
☒ Masterclass Course (3rd February and 5th February, 2026) (Please choose one)
☐ Lumbar stenosis (max 2 participants)
☐ Cervical (max 2 participants)
☐ Basic Course (3rd February and 5th February, 2026) (max 16 participants)

Participant (please complete information below)

First name: _____

Surname: _____

Title: _____

Hospital: _____

Country: _____

Specialty: ☐ Orthopedic Surgeon ☐ Neurosurgeon ☐ Others, please specify

E-mail: _____

Phone: _____

☐ Yes, I will use the shuttle transfer from JW Marriott Hotel Bangkok to the training location.

Have you ever participated in any full-endoscopic operations of the lumbar, thoracic and cervical spine training course?

- ☐ Yes, please specify date and place.
☐ No.

Have you ever performed full-endoscopic operations of the lumbar, thoracic and/or cervical spine?

- ☐ Yes, please specify types and approximate number of cases.
☐ No.

Special Dietary Needs:

- ☐ None ☐ Vegetarian
☐ Seafood Allergies ☐ Halal
☐ Other, please specify

Signature: _____ Date: _____

Course fee:

	Thai	Foreigner
☒ Intensive Course on 5 th and 6 th February, 2026 (max 12 participants)	THB 70,000	USD 2,400
☒ Masterclass Course on 3 rd February and 5 th February, 2026 >Lumbar stenosis >Cervical (max 4 participants)	THB 70,000	USD 2,400
☒ Basic Course on 3 rd February and 5 th February, 2026 (max 16 participants)	THB 40,000	USD 1,400

Participants:

Due to space limitation, only participants who receive confirmation from the Organization Office will be registered for the training. The Organization Office will provide payment information upon confirmation.

Direct Deposit

GE Healthcare

GE is making a new commitment to healthcare

We call it **healthymagination**

At GE, we believe what's needed, right now, is a new mindset that embraces that health is everything. Just as we delivered innovation in environmental technology with ecomagination, healthymagination will change the way we approach healthcare, with over 100 innovations all focused on addressing three critical needs: **lowering costs, touching more people and improving quality.**

Yes, costs need to be lowered, while still delivering the best technology possible. GE's Electronic Medical Records give doctors the information they need almost instantly and could save billions in costs over the next 5 years.

Reduce Costs

Increase Access

Access to healthcare should be more available and not determined by where you live. Equipment like GE's MAC 800 brings lifesaving ECG technology to patients in a unit smaller than a backpack, accessible to the most remote hospitals and clinics in the world.

Quality healthcare empowers more people through early detection and a higher level of care at home. As people age or face chronic conditions, they need innovations like Home Health technologies that remotely monitor their well-being so they can live independently.

Improve Quality
